

About Tori Client

What is Tori Client?

Tori Client is a bare-bones client designed with only the essential features most users need, in a smaller, more minimalist and vanilla-styled modpack. This helps to keep everything simple and very lightweight.

Tori Client is designed to be very user friendly to go hand in hand with its simplicity. In terms of specifications, Tori does have its own cosmetics system, with its cosmetics priced at 40% of the price or less of other clients on the market. Using Tori in-game has shown a performance boost for users, increasing FPS by 20% or more compared to other clients in most cases—all while keeping the game and launcher very lightweight.

We are very open to suggestions on things to add to this client, so if you have something on your mind feel free to [contact us!](#)

Official Resources

These are the official websites, resources, and services that are ran by Tori Client. If you have a question about the legitimacy of a website or service claiming to be associated with Tori Client, feel free to [contact us](#).
